How to Make Your Office Space More Conducive to Productivity

Having just opened an office outside of the home, I want to make it the best space possible. If you've worked in the corporate world for at least 10 years, you've probably seen all types of trendy and experimental office layouts. You've endured everything from sky-high cubicle walls to open-concept table clusters. Each iteration was intended to encourage increased productivity for employees. While it's true that no one particular style suits everybody, there are some principles that are generally good practice for creating an environment that stimulates better productivity.
